The Next
Big Thing
in Emission
Control!

PRO KARTING MANUFACTURING now offers the:

BlueCAT™ SSI Three-Way Catalysts

For use with small spark ignited (SSI) engines, the BlueCAT™ SSI emission control system is a direct-fit replacement for OEM mufflers.

Regardless if you're a worker, manager or a health and safety professional, the BlueCAT™ SSI is an emission control product designed to improve job site health and safety conditions.

BlueCAT™ SSI Product Versatility

Mindful of worker health and safety, the cost effective and easy to install BlueCAT™ SSI emission control solution is engineered and manufactured to integrate with all leading equipment and engine manufacturer designs.

PERFORMANCE

- Typical emission reductions
 - 98%* Carbon Monoxide
 - 95%* Hydrocarbons
 - 95%* Nitrogen Oxides

* Emissions performance may vary. Reference performance based on triplicate ISO 8178-02 test cycles with engine operating in closed-loop configuration.

PRODUCT FEATURES

- Ideal for gasoline, LPG and CNG engines used in off road applications
- Same OEM envelope for size, sound attenuation and back pressure characteristics
- Custom designs available

BENEFITS

- Reduced worker exposure to harmful engine emissions
- Improved localized air quality
- Increased workplace productivity
